

RIFQI INDRA SYAHPUTRA

Front end

I am a graduate of a Vocational High School (SMK) majoring in Software Engineering (RPL) who is committed to seeking opportunities in the world of information technology. I have a strong understanding in software development, as well as skills in programming and project management. During my studies, I was actively involved in projects involving programming, which has expanded my knowledge and skills in this domain. I also have the ability to adapt quickly to new technological developments. With a passion for learning and dedication, I am ready to contribute to a work environment that allows me to develop my talents and skills in software development
